

## In-House R&D Projects – LRC

**Year 2015-16**

S. No.	Project Name	Year	Progress
1.	Investigation of advance nano tanning / finishing to develop the microbiallyself protected leather & textile	2013-16	Completed
2.	Investigation of enzyme technology for indigenous resources and its application in leather processing to minimize the pollution load and to improve the quality of leather.	2013-16	Completed
3.	Leather Quality Assurance and Monitoring of Harmful Environmental Releases.	2013-16	Completed
4.	Design, Synthesis & Commercial Application of Eco-Friendly Dyestuff.	2013-16	Completed
5.	Design, Synthesis & Commercial Application of Eco-Friendly Dyestuff.	2013-16	Completed
6.	Development in dyeing & finishing techniques to introduce the low cost textile designs on Leather surface.	2013-16	Completed
7.	Development of techniques to reduce/ remove the ante-mortem & post-mortem defects in Leather processing.	2013-16	Completed
